I cut AI deployments from 3 months to 3 days. Method-led, evidence-bound, production-proven.

ABOUT

I architected **SYPNOSE** — the first entire AI organization launched in a single command. Not a chatbot: **300 parallel workers, 47 model routes, 4-year memory horizon**, shipping production software. I sell a method, not a demo — every claim is backed by systems running today.

THE SYPNOSE METHOD

- ▶ **3-layer memory (Index / Topics / Dream)** — context compounds across months; engineering velocity grows over time.
- ▶ **Dream consolidation at 3:30 AM (23 min, REM-analog)** — system arrives smarter every morning.
- ▶ **300 parallel workers in one command** — quarters of backlog collapse into weeks.
- ▶ **47 models via CLIPProxy at \$0 marginal cost** — best-fit model per task, no lock-in, no API runaway.
- ▶ **"No proof, no done" + 80% PR first-pass approval** — CTOs review evidence, not promises.

PRODUCTION EVIDENCE (LIVE, NOT SLIDEWARE)

GestorIA RD — Fiscal OS for **314 active accountants, 34K+ automated tasks/month**, full DGII integration (423 scraped fields).

FacturalA — Mobile OCR app: photo of invoice → structured form. Gemini Vision pipeline, production users.

IA Trader — 24/7 trading system, 4 coordinated agents (signal/risk/execution/audit) under real-money pressure.

DGII Harvester — Government portal scraper: 3-factor login, 6 fiscal forms, 423 fields, self-healing.

Casino QR — Encrypted QR ticket issuance/redemption, deployed and operational.

Backbone: Contabo VPS 24 GB · 23+ Docker containers · OpenClaw autonomous agent (847+ Telegram tasks).

ENGAGEMENT MODELS

Consulting Sprint (2–4 wk)	Fractional AI Lead (3–6 mo)	Custom Deployment
Audit, architecture, proof-of-method	Embedded Head of AI / CTO	Full SYPNOSE-Method delivery
\$120–200/h · €600–900/day	\$150–250K/yr equivalent	Fixed-price per scope

Remote (GMT-4, EU + US overlap). Spanish citizenship — no UE work-permit overhead.

STACK

Orchestration: Claude Code, Agent Teams, OpenClaw, Taskmaster — multi-agent waves, supervisor patterns.

LLM Ops: CLIPProxy routing 47 models (Claude, Gemini, Perplexity, Groq, Cerebras), caching, fallback chains, RAG.

Production: Next.js 15 / React 19 / TS, Node, Go, Python · Docker · Coolify · Cloudflare Tunnels · GitHub Actions.

Data: PostgreSQL, Supabase, vector search, n8n, OCR (Gemini Vision), real-time pipelines, government APIs (DGII).

Domains: Fiscal/Accounting, FinTech/Trading, LegalTech, B2B SaaS, MarTech.

BACKGROUND

31 years in technology. Self-directed pivot into applied AI and agent orchestration since 2024 — from first API call to 300-worker autonomous org shipping commercial products in under 24 months. Founder/operator of HUYGHU & ASOCIADOS, serving clients globally from Puerto Plata, DR.
